## XFP 10G 1550nm Single mode Optical Transceiver

## Description

The BlueOptics© BO31J15640D XFP transceiver is a high performance, cost effective module supporting a datarate up to 10 Gbps with 40 Kilometer link length on single mode fiber.

BlueOptics© transceivers are 100\% compliant with XFP Multi-Source Agreement (MSA).

All BlueOptics© XFP transceivers are always equipped with digital diagnostic function compliant to MSA SFF8472.

Using digital diagnostic, BlueOptics© XFP transceivers provide the following real time information:

- Supply voltage
- Laser bias current
- Laser average output power
- Laser received input power
- Temperature

The transceiver consists of five sections: An EML transmitter, a PIN photodiode, a trans-impedance preamplifier (TIA), the LD Driver and the digital diagnostic function.

## Applications

## Features

$\checkmark \quad 9.95 \mathrm{~Gb} / \mathrm{s}$ to $11.3 \mathrm{~Gb} / \mathrm{s}$ serial optical interface
$\checkmark \quad$ EML laser transmitter
$\checkmark \quad$ PIN photo-detector
$\checkmark$ Hot-pluggable XFP footprint compliant to INF-8077
$\checkmark$ Duplex LC/UPC type pluggable optical interface
$\checkmark$ 2-wire interface for management
$\checkmark$ Metal enclosure, for lower EMI
$\checkmark$ RoHS compliant and lead-free
$\checkmark \quad$ Single +3.3 V power supply
$\checkmark$ Compliant with SFF-8472
$\checkmark$ Case operating temperature

- Commercial: $0^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$
- Extended: $-10^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$
- Industrial: $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$
$\checkmark$ 10G Fibre Channel-1413-D
$\checkmark$ SONET/ SDH - OC192/SDH-64
$\checkmark \quad$ OC-192 over FEC - G. 709
$\checkmark \quad$ 10GBs Ethernet over G. 709
$\checkmark \quad$ 10G Ethernet - IEEE802.3ae

## Warnings

Handling Precautions: This device is susceptible to damage as a result of electrostatic discharge (ESD). A static free environment is highly recommended.

Laser Safety: Even small radiation emitted by laser devices can be dangerous to human eyes and lead to permanent eye injuries. Be sure to avoid eye contact with direct or indirect radiation.

## Warranty

Every BlueOptics© transceiver comes with a 5 year replacement warranty and lifetime support.
For a warranty inquiry, please contact your CBO sales representative.
This warranty only covers the first user of the equipment.

## Important Notice

Performance figures, data and any illustrative material provided in this data sheet are typical and must be specifically confirmed in writing by CBO before they become applicable to any particular order or contract. In accordance with the CBO policy of continuous improvement specifications may change without notice.

The publication of information in this data sheet does not imply freedom from patent or other protective rights of CBO or others.

Further details are available from any CBO sales representative.

## Installation

Before installation attach an ESD-preventive wrist to ensure not to damage the transceiver or hardware.

BlueOptics© BO31J15640D can be installed in any Small Form Factor Pluggable+ (XFP) port. You can install the BO31J15640D regardless if the system is powered on or off, because it is hot-swappable.

Insert the transceiver into the SFP port and remove the dust cap.

You can now connect your cable.

## 8. Digital Diagnostics / Digital Optical Monitoring

The transceiver provides serial ID memory contents and diagnostic information about the present operating conditions by the 2-wire serial interface (SCL, SDA).

The diagnostic information with internal calibration or external calibration are all implemented, including received power monitoring, transmitted power monitoring, bias current monitoring, supply voltage monitoring and temperature monitoring.
